(54) Title: **METHOD OF SERVICING THE OUTER COMPONENTS OF A WIND TURBINE SUCH AS THE WIND TURBINE BLADES AND THE TOWER WITH A WORK PLATFORM AND WORK PLATFORM**

(57) Abstract: The invention relates to a method of servicing the outer components of a wind turbine such as the wind turbine blades and the tower with a work platform, said method comprises the steps of: positioning the work platform at the wind turbine tower and connecting the work platform to an upper part of the wind turbine with at least one cable. Further the method comprises the steps of raising the work platform with the cable and cable winding means to a position of use, and holding the work platform to the side of the wind turbine tower with holding means. The invention also relates to a work platform for servicing the outer components of a wind turbine.
